-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The indicated allowability of claims 9-13 is withdrawn in view of the newly discovered reference(s) to Tuller et al. Rejections based on the newly cited reference(s) follow.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 8, 10-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tuller et al. (U. S. Pat. No. 6,234,184).

Re claim 8, for example, Tuller is cited disclosing in a dishwasher including a tub having bottom, opposing side, rear and top walls which collectively define a washing chamber adapted to receive and cleanse soiled kitchenware by spraying washing fluid onto the kitchenware from at least one wash arm, a pump and filtration assembly comprising:

a housing mounted at an opening provided in the bottom wall of the tub, said housing including an intake chamber and a pumping chamber;

a filter chamber (50) adapted to receive a portion of the washing fluid entering the pumping chamber, said filter chamber including at least one enlarged opening provided with a fine mesh filtering screen(54) for entrapping soil from the washing fluid in the filter chamber while permitting cleansed washing fluid to be directed back into the washing chamber; and

means for relieving filter chamber pressure when the fine mesh filtering screen becomes clogged, said filter chamber pressure relieving means including a pressure

relief valve (88) positioned to seal a pressure relief port (as at 72) open to the filter chamber for permitting washing fluid to flow from the filter chamber, past the pressure relief system and into the washing chamber.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuller et al.

Claims 13 and 14 define over Tuller only in the recitation of the flapper valve, nonetheless, the same is deemed to be an obvious matter of design in that the flapper valve is deemed to be merely the functional equivalent of the ball valve (see MPEP 2144.06 SUBSTITUTING EQUIVALENTS KNOWN FOR THE SAME PURPOSE). The claims would have been obvious because the technique for improving a particular class of a device was part of the ordinary capabilities of a person of ordinary skill in the art, in view of the teaching of the technique for improving other situations.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Hegeman et al, note the pressure relief tube.

7. Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to FRANKIE L. STINSON whose telephone number is (571) 272-1308. The examiner can normally be reached on M-F from 5:30 am to 2:00 pm and some Saturdays from approximately 5:30 am to 11:30 am.
